

# Center for Energy Education

## Center for Energy Education Teacher/Instructor

The Center for Energy Education is hiring an experienced teacher/instructor to design and teach renewable energy classes for K-12 students in multiple states. Lessons are to be highly interactive and STEM-based.

The teacher will be responsible for leading school events: science fairs, career days, Earth Day events, and other programs on campus and off-site at schools in North Carolina and other states.

Responsibilities include visiting schools to introduce solar technology, participation in career days, science fairs, and presentations to students.

The teacher will be responsible for:

- Budgeting and managing summer programs
- Leading summer camp programs for students and solar education workshops for teachers.
- Developing renewable energy programs for seniors and other community organizations.
- Identifying and completing applications for funding opportunities to support school programs.

Familiarity with coding desirable.

Knowledge of renewable technology is desirable.

**Interested candidates are to email their resume and cover letter to [contact@center4ee.org](mailto:contact@center4ee.org).**

*C4EE is a nonprofit organization located in Roanoke Rapids, North Carolina. Its mission is to build a place where education, research, and industry-leading professionals work and learn side-by-side and to educate and inform the community about all aspects of energy, from generation to consumption.*
